

# Nordic Waste Management Vision – NOWA

- **Duration:** September 2023 – December 2025
- **Partners:** waste management companies from Norway, Finland; digital solutions provider for waste management, Finland; Kajaani UAS (Finland), research institute from Sweden
- **Project goal:** increasing cross-border collaboration in waste management by various means of benchmarking waste management practices in northern regions of Norway, Sweden, and Finland, evaluating waste streams, processing capacity, logistics and environmental impact as well as identifying cross-border cooperation possibilities in waste utilization and valorization among the target countries.
- The project develops synergy solutions for efficient waste management that would enable to reach a critical mass of waste to be handled and effectively combine waste resources in each region and across.
- International piloting of data driven digital solutions by waste management companies in Norway, Sweden and Finland will contribute to sustainable logistics chains and development of new services, products, processes, and business models.
